

CAREER WOMAN

Career Facelift® delivers a double dose of 'va-va-voom', boosting confidence both at work and at home

Looking your natural best for as long as you can is the ethos behind leading plastic surgeon Angelica Kavouni's signature Career Facelift®.

Created with working women in mind, the demand for Angelica's trademark minimal intervention aesthetic treatments grows daily.

A lifelong advocate for the empowerment of women, Angelica knows how important it is for women to feel confident both socially and in the workplace. Many women over 40 comment that they feel invisible and undervalued in the workplace and keeping ahead of the ageing process can boost morale and self-assurance. Recently, Angelica has seen a rising number working women of all ages between 30 and 70 seeking help to slow the ravages of time and combat effects of 21st-century skin stresses.

'We constantly hear references to "glass ceilings" for women in business,' says Angelica.

'Personally, I like to think there has been a splintering of this barrier, with an increasing number of us reaching for and achieving our work goals. But along with this positive trend, the majority of professional women I encounter through my work say that they feel pressure to stay looking as good as they can for as long as they can, but they do not want to look "done" either. This was the main catalyst for developing my anti-ageing skincare treatment plan as my "tweakments" give very natural results.'

The Career Facelift® concept embraces all anti-ageing treatments – both surgical and aesthetic. 'Each woman's needs and concerns are unique, so I have to be flexible with the solutions I offer. By utilising a blend of what I believe to be the most important and effective anti-ageing tools, I can help women look naturally rested and refreshed, with onlookers unable to pinpoint their age. A perfect end result!'
